

You are tasked with reviewing the functionality and user experience of the DemoBlaze website (<https://www.demoblaze.com/>) to identify bugs. Follow the steps below to complete the exercise:

1. **Explore the Web Application**
 - Navigate through the different sections of the website
 - Test the application on desktop browsers to ensure its functionality operates as expected.
2. **Identify Bugs**
 - Detect and report any bugs or issues encountered during the testing process.
 - Provide a severity to indicate the significance of each bug's impact on the product quality.
3. **Report Bugs**
 - Create detailed and clear reports for each bug you identify to ensure that everyone reviewing the report can easily understand the issue.
4. **Propose Solutions**
 - Include an identification of areas that may potentially be impacted by the bugs you consider critical.
